

The Cost of Doing Nothing?

Please consider the following questions to the proposition above:

- What will you do, where will you go when disaster strikes.
- What is a life worth, yours and other people, if becomes disabled or deceased, verses staying alive and well.
- What is lowering human pain and suffering worth during a and after a tragedy.
- What is lowering overall emergency health care cost worth in dollars saved?
- What is having Peace-of-Mind, less stress and worry of future disaster tragedy, worth to you and love ones?
- See our Psychological Benefit- White Sheet Paper
- And this list of questions can go on and on...

The above questions depend on one's point of view and if we are talking about you or someone else. And do you consider everyone life of equal value? Since every life is god given, one of kind, irreplaceable, and therefore can't be taken for granted, so do you believe we should protect all lives to the best of our ability?

Especially when disasters continually strike and we now know and have better ways to protect all people anywhere, anytime; having solved many age old disaster problems, that has plagued mankind since the time of man.
