

Optional Combination Tent Frame Support System, Open-fire Cooking Poles and Hunting Spears Utilizing Basic Parts.

Our optional combination tent-frame support system built for our 4-foot and 6-foot-8-inch trolleys also utilized the same parts for open-fire cooking at adjustable heights and furthermore as hunting spears.

These modified parts serve three functions: stabilizing the automatic pop-up tent in extreme weather conditions, such as high winds, rain, snow, ice, and extreme heat, supporting an open campfire placed on the ground and hunting spears.

Strong load-bearing capacity

Adjustable chain length

3 levels of height adjustment

Hunting spears for fish and small game. The three telescopic snap design poles used for open fires detach as separate parts with fittings attached for different arrow tips, depending on the type of game and its size. These are not toys, but survival tools to be used in emergencies.
